Pick a Project

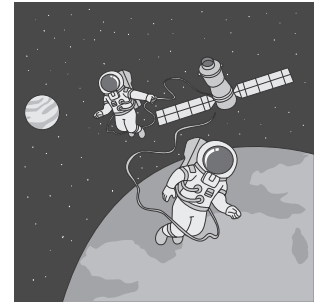

Project 10A

Movie Time!

Many people like to watch movies. You can see movies at a theater. You can also watch them on television or on a phone.

What kinds of movies do you like? Some are about animals. Other movies are about space travel.

The Best Movies

Crazy Pets ★★★★★

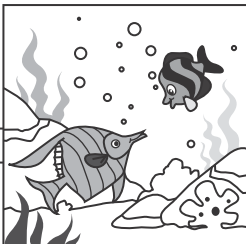

Robo-Pal ★★

You can read a review of a movie before you see it. In a review, a writer tells about the movie and explains if it is good or bad. Reviews also tell how long a movie lasts.

Your Project Write Movie Reviews

A Fish Tale
Run time: 114 minutes

A father fish tries to find his lost son.
This movie is funny and can be scary.

Write reviews for two movies that last more than 100 minutes. Give the titles and run times. Draw a scene from each movie. Tell a little about what happens and what you did or did not like about each movie. Write an equation to find the total run time of the two movies.

_____ + _____ = _____ minutes

Project 10B

Block the Shot!

Basketball is a fast and fun team sport. To score points, players shoot the ball through a hoop. When adults play, the hoop is 10 feet high.

Players try to keep the other team from scoring. They jump high and block shots with their hands.

Players can also steal the ball from the other team. They can grab the ball when it is passed or when it bounces.

Your Project Make a Basketball Poster

Choose two professional basketball teams. Make a poster with 4 facts about each team. Then choose a season, like 2018–2019. Look up statistics, or data, for each team. Find the number of blocked shots each team had for several games. Write an equation to show the sum of the two teams' blocked shots.

Team A	Team B
1.	1.
2.	2.
3.	3.
4.	4.
5. ___ blocked shots	5. ___ blocked shots

←————→

___ + ___ = ___

Project 10C

State Capital

Every state in the United States has a state capital. Some cities were chosen as capitals based on location.

In some states, the capital is the largest city. In other states, some cities are larger than the capital.

State capitals often have special buildings where the government of the state may meet.

Your Project Draw a State Map

Draw a map of your state. Label the state capital. On your map, mark and label two cities that are each less than 500 miles from the capital. Write the distances. Then find the total of those two distances. Draw place-value blocks to show your solution.

You can also find out and write some facts about your state's capital on your map.

Project 10D

California Mountains

California is a state on the West Coast of the United States. A long chain of mountains runs along the eastern side of the state.

These mountains are called the Sierra Nevada. There you can see forests, rivers, and lakes. Lake Tahoe is a large, deep lake.

People like to hike in the Sierra Nevada Mountains. Some trails are so long they can take 2 or 3 weeks to hike!

Your Project Create a Hiking Guide

Look for information about hiking in the Sierra Nevada Mountains. Learn about the plants, animals, and landforms there. Then fold a piece of paper in half and make a short guide for hiking. On the back, tell the length of the John Muir Trail and the Tahoe Rim Trail in miles. Find the total length of the two trails.

Explain your strategy.

_____ + _____ = _____ miles
