

## How Many? Dicey Dilemma

Look at the picture below. There are many different ways to count how many in this picture. One way to answer "how many?" is to count objects. Another is to see the total right away. Thinking about different ways to count, looking for equal groups, and describing the total using words and symbols.

Example: There are 2 Ms in the picture worth 6 points.

Each set has four tiles.

There are many different ways to count the items in the picture! Find as many ways possible!
